

Plastic Starco buckets

V.A.V. supplies plastic Starco elevator buckets made of PEHD and nylon ex stock. Besides, PU and zytel are also available.

Plastic elevator buckets lend themselves par-

ticularly well to the transport of wet, sticky or fatty products. Another advantage is that plastic elevator buckets do not strike a spark even if the belt is misaligned.

Starco elevator buckets made of plastic (parameters in mm)

Type	Size/weight					Kg	Volume		Holes		no. bckts/m	Max.
