

Plastic Super Starco buckets

The Super Starco buckets are deeper than the 'regular' Starco buckets, although they are equally suitable for elevators with higher belt speeds.

This elevator bucket lends itself particularly well to light-weight and/or wet materials. V.A.V. supplies the Super Starco in PEHD en nylon.

Super Starco elevator buckets made of plastic (parameters in mm)

Type	Size/weight					Kg	Volume		Holes		Max. no. bckts/m
